github.com/nitroc-dev

Software engineer who builds web and mobile products end to end, from the data model to the App Store release. At Eachstapp I work on a B2B SaaS used by 7 mediation services, React Native apps in sports and travel, and the C#/.NET APIs behind them.

Experience

Software Engineer · Eachstapp — Oct 2024 – Present

- Build and run a B2B SaaS for mediation services, now used by 7 services.
- Ship React Native apps (bare and Expo) in sports and travel, owning App Store and Google Play releases.
- Make architecture and data-model decisions on new features; deploy and maintain production systems.
- Work directly with clients on requirements, demos and support.

Software Engineer Intern · Eachstapp — Jan 2024 – May 2024

- Delivered features on client web and mobile projects in TypeScript, React and React Native.

Personal projects

Each named after the Greek god whose domain matches what it does.

Helios Ἥλιος — Tauri 2 · Rust · React · SQLite

Native Windows app that runs my day: calendar, tasks, habits and spending built from 21 widgets, plus a launcher on the bare Windows key replacing Raycast. All data stays local.

Selene Σελήνη — Tauri 2 · Rust · React

Homelab dashboard split out of Helios: servers, services, containers and network on one page. In progress.

Zeus Ζεύς — Next.js · TypeScript · Tailwind

This portfolio (nitroc.xyz): bilingual EN/FR, my own design system shared with Helios, no backend, 100 Lighthouse score.

Skills

Languages	TypeScript, JavaScript, C#, SQL, HTML/CSS, Rust (learning), Java, C
Frameworks	React, Next.js, React Native, Expo, .NET, EF Core, Tauri
Tools	PostgreSQL, SQL Server, Azure, Vercel, Docker, Git, GitHub Actions

Education

Computer Science · Haute École Léonard de Vinci, Brussels — 2021 – 2024

Languages

French (native) · English (professional) · Dutch (basic)

Outside work

Runs a homelab: TrueNAS SCALE, Traefik and two Raspberry Pis in a 3D-printed 10" rack.
